

# J-Type Connectors

### The Cinch Advantage

Cinch J-Type connectors are used in Europe, mainly in industrial applications where heavy impact forces are expected. The J-Type connectors incorporate a resilient 12 finger contact. The 12 finger socket contact engages with each flat plug pin to provide low contact resistance, high current carrying capacity and minimum insertion and withdrawal forces. These special features help to provide a thoroughly reliable connector, enhanced by MK. 2 shells moulded in grey high impact thermoplastic for appearance and durability. No. 4 thread cutting screws with Pozidriv heads are provided loose for assembly of plugs/sockets into MK. 2 shells. For uniformity Pozidriv headed screws are now supplied for cable clamp adjustments.

#### **Features**

- 12 finger socket resilient contacts
